Skills

- Programming Languages: Python, PHP, Shell Scripting
- Databases: MySQL, Oracle, Snowsql, Postgres
- ETL-Tools: Matillion, Qlik Replicate, Snowflake
- Netrevel, Source Tree, Bitbucket, Jira, Unix

Experience

INFOSYS LTD.

Dec 2019 - Present (2.4
years)
infosys.com

Senior Systems Engineer

Account: Westpac Banking Corporation

Domain: Financial Services - Compliance and Risk Related Projects

Modernized client's data landscape from Oracle to Snowflake Cloud Data warehouse using novel ETL tools like Matillion & [Qlik Replicate](#)

- Configured [Netrevel Tool](#) to Validate data and generate Threshold Transaction Report (TTR).
- Built re-usable ingestion framework using novel tools like [Matillion ETL](#) for [Snowflake](#) and built replication jobs.
- Built robust, scalable pipelines to replicate data from various endpoints (Oracle, IBM Db2, XML, JSON, CSV) to Snowflake for Data warehousing.
- Developed Audit Jobs to Monitor ETL and EDW process.
- Developed python scripts to Automate Job Deployment, and send email-notifications of job status.
- Developed python script using [Matillion ETL API](#) to trigger ETL jobs via [Control-M](#) and generate logs.
- Expertise in writing Optimized SQL queries for Complex data Analysis

Certifications

- Infosys certified Python Associate
- Infosys certified MySQL Associate
- Infosys certified Open Chain Practitioner
- Infosys certified Agile developer Certification
